EMPLOYMENT HISTORY

VITAMIN D CREATIVE | Web developer 2009 - present

WordPress, HTML/JavaScript developer, graphic optimization, HTML email developer, banner animation, SEO.

With VitaminD I create new websites and implement changes for existing ones. Routine tasks are set up and migrate a WP website, edits to DNS records, use CloudFlare, edit PHP, to make a specific customization of a chosen theme. Create websites and make changes using JavaScript alone. BrowserLing and BrowserStack are used for cross browser testing. I create animated banners using HTML5, and HTML templates for emails.

Tap and Fork | UX designer 2016 - 2017

UI prototype for web-based graphic ads builder, UI and UX design for mobile app. Incorporate latest UI trends to meet and exceed user expectations.

AT&T | Banner developer 2008 - 2009

Graphic development in a very fast corporate environment, use product data management software, collaborate with the testing team, meet deadlines.

SEALS & STAMPS | Web & graphic developer 2007 - 2008

Creation and administration of the company website, graphic development for printing and laser engraving products.
